## THE NEW GENERATION MICRO-CHANNELLING

NBE Deep skin is a revolutionary device with 3 unique pens: Ablator, Infuser and Corrector. The Ablator does a deep cleansing of the skin to remove dead skin cells. This ensures further skin treatments to work more effectively. The deep abrasion of the Ablator stimulates the skin's natural defence mechanisms as well. The Infuser and Corrector provide the epidermis with micro-channels without damaging it, this allows the specially developed serums to penetrate deep into the skin. This promotes the growth of new cells and slows the ageing of the skin, resulting in a long-term improvement of the skin.

What does this mean for your skin?

Rejuvenating and improving the skin with active, visible and long-lasting effects • Combating wrinkles • Treating large pores and pigment stains • Activating the self-healing power of skin • Restoring moisture and skin density • Improving elasticity • Combating acne, scars and stretch marks • Increasing collagen and elastin production

# NANNIC

SKIN CARE BY SCIENCE

## NANNIC - BIO ACTIVE FORMULAS

NANNIC skin care products, with their unique cell-identical formulas, transport highly concentrated active ingredients deep into the skin for visible skin rejuvenation. NANNIC advanced formulas contain a maximum concentration of active components that act synergistically for optimum skin improvement. All formulas contain medically proven active components and are dermatologically tested.

NANNIC is distributed in over 38 countries. NANNIC International is a successful third generation family business. The headquarters are in Belgium, where research, development and production are conducted in collaboration with leading researchers and dermatologists worldwide. NANNIC has a very exciting and innovative product portfolio which is being offered to skin care salons, clinics and spas. A unique concept with advanced equipment, treatment serums and special accessories enabling revolutionary performance for modern skin care.
